Step by step installation of MT Manager for Xsens for ubuntu

1. The link below will take you to the dowload page for MT suites :

- MT suites

2. Extract the content at the approptiate location on your computer.

3. Make sure you already have the following packages installed :

   - QT5
   - libqt5opengl5
   - libusb-1.0-0
   - libxcb-xinerama0
   - libxcb-xinput0
   - libdouble-conversion1

4. Run those two scripts :

   - ./MT_Software_Suite_linux-x64_2021.0/mtsdk_linux-x64_2021.0.sh
   - ./MT_Software_Suite_linux-x64_2021.0/mfmsdk_linux-x64_2021.0.sh

5. Make sure the current user is in the dialout group, if not run :

   - sudo usermod -G dialout -a $USER

6. Run the mtmanager in bin :

   - ./MT_Software_Suite_linux-x64_2021.0/mtmanager_linux-x64_2021.0/mtmanager/linux-x64/bin/mtmanager

7. If there is still issues please refer either to the MTM.README or the website

8. Eventually try :

   - sudo modprobe ftdi_sio
   - echo 2639 0301 | sudo tee /sys/bus/usb-serial/drivers/ftdi_sio/new_id
